**EXAMINER'S AMENDMENT AND REASONS FOR ALLOWANCE**

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/27/2009 has been entered.

1. This action is responsive to applicant's amendment dated 4/27/2009.
2. Claims 1-20 are pending in the case.
3. Claims 1 and 11 are independent claims.

**EXAMINER'S AMENDMENT**

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Peter Gordon on 5/20/2009.

The application has been amended as follows:

1. (Currently Amended) A method, operable on an application within a computer system, for streamlining manual dropping of a plurality of objects within a display using an input device, the display presenting a surface suitable for dropping objects into, the input device being capable of converting user input into a two-dimensional position to drive a position of a cursor on the display, the method comprising:

detecting user action of dragging at least two objects from another application or a source of draggable objects in the application over said display using said input device, said at least two objects forming a list of attached objects, and entering a dropping mode while the at least two objects are attached to the cursor;

while at least one of said at least two objects remains undropped, continuing to execute the following actions while in the dropping mode:

- a) displaying a visual representation of each of said objects in said list proximal to a current position of said cursor, as a set of thumbnails, and
- b) when the user's intention to drop an object is detected, executing the following actions:

- b1) processing dropping of a first object in said list of attached objects into said surface at a position dictated by the current position of said cursor,
- b2) removing the visual representation of said dropped object from said set of thumbnails, and

- b3) removing said dropped object from said list of attached objects;
- c) performing steps b1), b2) and b3) for each object to be dropped, so that each of said at least two objects ~~can be~~ are sequentially dropped at unique locations independently of other objects in said list of attached objects; and exiting said dropping mode when the list of attached objects is empty.

11. (Currently Amended) A computer readable medium having computer instructions stored thereon for implementing a method of streamlining manual distribution of a plurality of objects within a display using an input device, the display presenting a surface suitable for dropping objects into, the input device capable of converting user input into a two-dimensional position to drive a position of a cursor on the display, the method comprising:

detecting user action of dragging at least two objects from another application or a source of draggable objects in the application over the display using the input device, said at least two objects forming a list of attached objects, and entering a dropping mode while the at least two objects are attached to the cursor;

while at least one of said two objects remains undropped, continuing to execute the following actions while in the dropping mode:

- a) displaying a visual representation of each of said objects proximal to a current position of said cursor, as a set of thumbnails, and
- b) when the user's intention to drop an object is detected, executing the following actions:

- b1) processing dropping of a first object in said list of attached objects onto said surface at a position dictated by the current position of said cursor;
- b2) removing the visual representation of said dropped object from said set of thumbnails; and
- b3) removing said dropped object from said list of attached objects;
- c) performing steps b1), b2) and b3) for each object to be dropped, so that each of said at least two objects ~~can be~~ are sequentially dropped at unique locations independently of other objects in said list of attached objects; and exiting said dropping mode when the list of attached objects is empty.

***Allowable Subject Matter***

- 5. Claims 1-20 are allowed.
- 6. The following is an examiner's statement of reasons for allowance:

As amended, independent claims 1 and 11 recite the features of dragging at least a collection of two objects while the objects are represented as thumbnails attached to the cursor and sequentially dropping each object independently of other objects while having the thumbnails reflect the dropped object (see Figure 6). The

combination of IBM Drag and IBM Multi-Icon fail to expressly describe or render obvious at least these recited features in the independent claims.

The primary reference IBM Drag teaches dragging a collection of objects while the collection is represented as thumbnails attached to the cursor. However, IBM Drag fails to expressly teach sequentially dropping each object independently of other objects while having the thumbnails reflect the dropped object. Instead, IBM Drag teaches that a user must drop the entire collection of objects as a whole. Therefore, IBM Drag lacks the capability to individually drop one object at a time while the collection of objects is attached to the cursor.

Furthermore, the applied art made of record fail to resolve the deficiencies of IBM Drag.

Accordingly, claims 1-20 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
